Internship Report

On

Rhiti Sports Management Pvt. Ltd.

Noida Office Plot No 1-C, 18th Floor, Windsor Grand Building, Sector 126,Noida - 201313

Session: August 2025 – November 2025

Supervised by:

Mr. Rishi Awasthi

(Lead Tech, Rhiti Sports)

and

Dr. Antim Chauhan

(Assistant Professor, SCSET, Bennett University)

Submitted by:

Vaibhav Gupta

B.Tech (Computer Science Engineering)

E22CSEU1505

SCHOOL OF COMPUTER SCIENCE ENGINEERING AND TECHNOLOGY,

BENNETT UNIVERSITY

CERTIFICATE

This is to certify that the student named Vaibhav Gupta (Enrollment No. E22CSEU1505) of Programme Name B.Tech (Computer Science Engineering), has undertaken an internship/industry project titled at Rhiti Sports from 11th August 2025 to 11th November 2025. This progress report is a bona fide record of the work completed during the above period.

Date:

Internal Guide / Faculty Mentor:

Dr. Antim Chauhan

Industry Mentor:

Mr. Vivek Prasad

ACKNOWLEDGEMENT

I sincerely thank my faculty mentor, Dr. Antim Chauhan, for their continuous guidance and support throughout my internship. I would also like to express my gratitude to my industry mentor, Mr. Vivek Prasad, and the team at Rhiti Sports for providing me the opportunity to work on real-world systems and gain practical exposure. I extend my thanks to the Department of Computer Science and Engineering at Bennett University for facilitating this internship opportunity.

Chapter 1: Introduction of the Report

The internship was carried out at **Rhiti Sports Management Pvt. Ltd**, India's first digital lottery licensed by the Government of Goa, and a skill-based e-gaming platform currently under development. As part of the Data Science team, I contributed to building data-driven solutions that enhance decision-making and user engagement within the platform.

Background:

Rhiti Sports Management Pvt. Ltd is developing a next-generation skill-based e-gaming platform integrated with India's first digital lottery system. With the increasing scale of user activity and transactions, the company required data-driven insights and reporting solutions to monitor performance, improve operations, and enhance player experience. This created the need for efficient dashboards and exploratory data analysis (EDA) to extract meaningful patterns from large datasets.

Purpose:

The purpose of the project was to leverage data science techniques to transform raw data into actionable insights. The focus was on preparing personalized **Power BI dashboards**, conducting **Exploratory Data Analysis (EDA)**, and generating reports that could guide management in strategic decision-making, operational efficiency, and user behaviour understanding.

Technology Used:

The stack and tools used during the internship included:

- **Excel** – for initial data cleaning and quick analysis
- **Power BI** – for interactive dashboards and visualization
- **Python (Pandas, NumPy, Matplotlib)** – for data wrangling, EDA, and visualization
- **MySQL & PostgreSQL** – for querying and managing structured data

Scope:

The scope of the internship involved:

- Developing interactive **Power BI dashboards** tailored for different stakeholders
- Conducting **EDA** to uncover trends, anomalies, and patterns in gaming data
- Preparing **data-driven reports** for business insights and strategy formulation

- Working with relational databases (**MySQL & PostgreSQL**) to extract and transform data
- Collaborating with the development team to ensure insights align with product goals

Chapter 2: Overview of the Organization

Rhiti Sports Management Pvt. Ltd. is a leading sports management and media company in India, known for representing top athletes, organizing sporting events, and driving digital innovation in the gaming sector. The company has diversified into creating **India's first digital lottery licensed by the Government of Goa** and is building a **skill-based e-gaming platform** to enhance user engagement and entertainment.

Major Activities:

- Sports talent management and brand building
- Organizing and promoting sports events and sponsorships
- Developing India's first digital lottery and e-gaming platform
- Driving user engagement through data-driven insights and dashboards

Hierarchical Structure:

The organization is structured across multiple divisions including **Sports Management, Event Management, Media, and Digital Gaming**. The **Data Science team** functions under senior data analysts and product managers, with interns contributing to **dashboard development, exploratory data analysis (EDA), and reporting tasks** under mentorship.

Chapter 3: What I Have Learned

Duration: (August 2025 – November 2025)

Departments Assigned: Data Science & Analytics

Responsibilities and Activities:

- Designed and developed **personalized Power BI dashboards** for management and stakeholders
- Conducted **Exploratory Data Analysis (EDA)** to extract insights from large gaming and lottery datasets
- Prepared **data reports** highlighting user behaviour, transaction trends, and revenue metrics
- Performed **data cleaning and preprocessing** using Excel and Python (Pandas, NumPy)
- Queried and managed relational databases (**MySQL & PostgreSQL**) for structured data extraction
- Created **visualizations** using Matplotlib and Power BI to support decision-making

Skills Gained:

- Proficiency in **Power BI dashboard design** and interactive reporting
- Improved knowledge of **data analysis with Python libraries (Pandas, NumPy, Matplotlib)**
- Hands-on experience in **SQL querying and database management** (MySQL & PostgreSQL)
- Understanding of **EDA techniques** for identifying patterns, anomalies, and business insights
- Enhanced skills in **data visualization, storytelling, and reporting for stakeholders**
- Exposure to **collaborative workflows** within a data-driven organization

Conclusion:

The internship provided practical exposure to real-world data science applications in the gaming and lottery industry. I gained experience in **building interactive dashboards, performing deep data analysis, and delivering actionable insights** to support strategic decision-making. This opportunity strengthened both my technical and analytical skills, while also giving me an understanding of how data science drives innovation in the digital gaming sector.

Chapter 4: Progress Summary

Tasks Completed:

- Developed and customized **Power BI dashboards** for management and stakeholders
- Conducted **EDA (Exploratory Data Analysis)** to identify key patterns and trends in gaming and lottery data
- Cleaned and pre-processed raw datasets using **Excel, Pandas, and NumPy**
- Queried and managed structured data from **MySQL and PostgreSQL** databases
- Created detailed **visualizations and reports** using Power BI and Matplotlib
- Provided **actionable insights** to support strategic and operational decisions

Milestones Achieved:

- Delivered **personalized dashboards** tailored to business requirements
- Successfully integrated **multiple data sources** into a unified reporting structure
- Automated parts of the **reporting workflow** to save time and reduce manual effort
- Improved **data accuracy and visualization quality** for business insights
- Strengthened collaboration with the product and management teams through data-driven reporting

Challenges Faced:

- Handling **inconsistent and incomplete datasets** during analysis
- Managing **large data volumes** while ensuring performance in Power BI dashboards
- Dealing with **complex SQL queries** and optimization for faster results
- Ensuring **data integrity** across multiple sources before visualization
- Translating **technical insights** into simplified reports for non-technical stakeholders

Reflections:

Through this internship, I contributed to improving **data accessibility, reporting accuracy, and decision-making processes** at Rhiti Sports. The experience enhanced my skills in **data visualization, EDA, and database management**, while also strengthening my ability to solve real-world data challenges in the gaming and digital lottery industry.

Weekly Work Logs

Week No.	Dates(From-To)	Task Description	Hours Spent	Mentor Signature
1	Aug 11 – Aug 15	Onboarding and orientation, introduction to organization policies, meeting the team, getting familiar with the codebase and existing workflows.	40	
2	Aug 18 – Aug 22	Performed data cleaning and preprocessing using Excel and Python (Pandas, NumPy) to prepare raw datasets for analysis.	40	
3	Aug 25 – Aug 29	Conducted exploratory data analysis (EDA) on gaming and lottery data to identify patterns, anomalies, and key trends.	40	
4	Sept 01 – Sept 05	Designed initial versions of Power BI dashboards; integrated data from MySQL and PostgreSQL for reporting.	40	
5	Sept 08 – Sept 12	Enhanced Power BI dashboards with interactive filters and visualization improvements; created reports for management insights.	40	
6	Sept 15 – Sept 19	Optimized SQL queries for faster data retrieval, automated parts of reporting workflow, and refined dashboards.	40	
7	Sept 22 – Sept 26	Finalized dashboards and reports; presented insights on user behavior, transaction trends, and revenue performance.	40
